

WUE 2026

SPONSORSHIP INVITATION

WHAT IS WEC?

The Western Engineering Competition (WEC) is one of Western Engineering's largest annual events, celebrating innovation, teamwork, and problem-solving. Featuring 10 unique competitions open to students of all years and disciplines, WEC challenges participants to apply classroom knowledge to real-world engineering problems in a hands-on, competitive environment.

Winners from each category advance to represent Western at the Ontario Engineering Competition (OEC), with the chance to compete nationally at the Canadian Engineering Competition (CEC). More than just a competition, WEC fosters creativity, collaboration, and technical growth among students who are passionate about engineering and design.

400+ competitors annually | 10 competition categories | Gateway to OEC & CEC

THIS YEAR'S THEME

We are thrilled to announce that this year's challenge will take root in a theme that feeds the world: Agriculture. From designing smarter irrigation systems and advanced agricultural equipment to improving crop processing, storage, transportation, and resource management, participants will tackle the engineering systems behind modern food production.

As agriculture faces rising demands, environmental pressures, and economic constraints, competitors will be challenged to create practical, sustainable solutions for one of the world's most essential industries. This theme pushes students to think beyond the field and explore how engineering can shape the future of farming, production, and global resource systems.

By exploring challenges at the intersection of technology, sustainability, and food security, this theme offers industry partners a unique opportunity to engage with and inspire the next generation of engineering leaders.

MESSAGE FROM THE DEAN

May 28, 2026

I am very pleased to provide this letter of support for the 2026 Western Engineering Competition (WEC).

The dedicated team of undergraduate engineering students organizing WEC 2026 has demonstrated exceptional initiative, professionalism, and commitment throughout the planning process. They have assembled an enthusiastic and capable group of volunteers who are working diligently to coordinate the many logistical, financial, and operational aspects required to host a successful competition.

The University of Western Ontario, the Faculty of Engineering, and the City of London together provide an outstanding setting for this national event. Western is recognized as one of Canada's leading research-intensive universities and is situated within one of the country's key industrial and innovation corridors. Our Faculty is home to several world-class research facilities, including the Institute for Chemicals and Fuels from Alternative Resources (ICFAR), the Insurance Research Lab for Better Homes, the Fraunhofer Project Centre for Composites Research, and the Wind Engineering, Energy and Environment (WinEEE) Institute. These facilities contribute significantly to both graduate and undergraduate education while helping prepare future engineering leaders and innovators.

WEC offers students a valuable opportunity to collaborate and compete in an engaging and supportive environment that highlights both technical expertise and professional skills. Participants will also benefit from opportunities to connect with leaders across Canada from industry, government, and academia.

I am confident that the organizing team possesses the leadership, experience, and dedication necessary to host an exceptional competition. The students also continue to receive strong support from the Undergraduate Engineering Society and the broader Faculty community. Hosting WEC is an excellent opportunity to showcase Western Engineering, our campus, and the many student clubs, organizations, and large-scale design projects that contribute to our vibrant student experience.

With great pride in our students and their accomplishments, I encourage you to give this proposal your full consideration and to support the competition through sponsorship. Your support will help us showcase Western Engineering, Western University, and the City of London to student competitors, industry representatives, and academic leaders from across the country.

Sincerely,

Kenneth S. Coley, PhD, P.Eng.
Dean and Professor
Western University – Faculty of Engineering

MESSAGE FROM THE CO-CHAIRS

Dear Prospective Sponsor,

On behalf of the Western Engineering Competition (WEC), we are delighted to welcome you to our 2026–2027 sponsorship package.

WEC is Western University's premier undergraduate engineering competition, bringing together the brightest engineering minds from across Ontario for a weekend of innovation, collaboration, and real-world problem-solving. Held annually at Western University, WEC challenges students across 10 competitive categories to apply their academic knowledge to industry-relevant problems, bridging the gap between the classroom and the professional world.

Our mission is simple: to empower the next generation of engineers. We believe that competitions like WEC play a vital role in a student's development – sharpening technical skills and building the confidence, creativity, and professional networks they need to thrive in their careers. With over 400 competitors each year, WEC has become one of the most anticipated engineering events on campus, and we are committed to making every edition more impactful than the last.

None of this would be possible without the support of sponsors like you. Your contribution directly funds the resources, logistics, and experiences that make WEC a world-class event for our students. In return, sponsoring WEC offers your organization a meaningful opportunity to connect with top engineering talent, build brand recognition on campus, and invest in the future of the profession.

This package outlines our available sponsorship tiers and custom partnership options designed to align with your organization's goals and interests. We are proud to work closely with our sponsors to ensure the partnership is as valuable to you as it is to our students.

We are truly grateful for your consideration and hope to have the privilege of partnering with you to make WEC 2026–2027 an unforgettable success.

Warm regards,

Yasi Movahedi and Natalie McGillicuddy
Co-Chairs, WEC 2026-2027

COMPETITION CATEGORIES

JUNIOR DESIGN

In the Junior Design competition, teams of first- and second-year students are challenged to design and construct a feasible, functional product that addresses a real-world task. Competitors navigate constraints such as limited resources and time, and are judged on functionality, CAD modelling, and design process.

SENIOR DESIGN

The Senior Design competition tasks teams of undergraduate students from all years with designing a feasible, functional solution to an advanced, modern, real-world problem involving a technical aspect. With practical constraints such as time and limited materials, competitors are evaluated on functionality, technical integration, and a short presentation of their design process.

MINI DESIGN

In the Mini Design competition, teams of Grade 11 and 12 students are tasked with designing and constructing a feasible, suitable solution to a real-world problem. With limited time and materials, students are graded on the functionality of their design and a short presentation detailing their design process.

PROGRAMMING

The Programming competition challenges teams to build a solution using industry-quality software to address a modern-day societal problem. Competitors are judged on the functionality, efficiency, and quality of their software, as well as a short presentation explaining their ideas and design process.

CONSULTING

In the Consulting competition, teams develop a multidisciplinary solution to a given problem based on the needs of a real-world client. Participants deliver a detailed presentation and a concise report, judged on their ability to meet the client's needs effectively.

COMPETITION CATEGORIES

DEBATE

The Debate competition is a bracket-style tournament where teams create arguments for and against a relevant engineering issue. Teams are evaluated on the strength and thoughtfulness of their arguments, their ability to apply relevant engineering concepts, and their responsiveness to opponents' arguments.

RE-ENGINEERING DESIGN

In Re-Engineering Design, teams develop innovative solutions to improve an existing design and address real-world needs. Participants present a working prototype and design process, judged on originality, feasibility, functionality, and economic impact.

BIO-ENGINEERING

In the Bio-Engineering competition, students address and create a solution to a problem related to biomedical engineering. This competition is open to all disciplines. Students prepare a concise presentation judged on the novelty, creativity, and feasibility of their solution.

CIVIL DESIGN

The Civil Design competition tasks teams with creating practical infrastructure solutions to real-world civil engineering challenges. Competitors develop a detailed design plan considering structural integrity, sustainability, cost-efficiency, and safety. Projects are judged on technical accuracy, creativity, and durability.

CHEMICAL DESIGN

In Chemical Design, teams solve agricultural engineering challenges using chemical engineering principles. They design sustainable solutions and present them through reports and presentations, judged on technical merit, environmental impact, and feasibility.

WHY SPONSOR WEC?

Campus Recruitment & Networking

WEC delivers direct exposure to Western University's engineering talent through social media, competition ceremonies, our website, and branded merchandise. With 400+ competitors drawn from every engineering discipline – spanning first-year through graduating students – WEC is one of the most targeted recruitment platforms available to engineering employers in Ontario.

Sponsors gain access to students actively seeking co-op placements, internships, and full-time roles, and can build brand recognition long before campus recruiting season begins.

WEC Career Fair

The Career Fair takes place during WEC Weekend and is open to all sponsors. It provides a direct, high-energy opportunity to connect with eager engineering students through interactive booths. Representatives can engage students in conversations about company culture, goals, and available opportunities – including internships, co-op terms, and full-time positions.

Resume Bank & Student Engagement

All sponsors receive access to a resume bank containing profiles from all 400+ competitors across a wide range of disciplines. This allows you to identify and reach out to students who align with your organization's goals – before they accept other offers.

Sponsors can also deepen their involvement by participating as competition judges, keynote speakers, or on expert panels. These opportunities create meaningful, memorable engagement with students while strengthening brand recognition within the Western Engineering community.

Brand Visibility

Custom competitor T-shirts featuring sponsor logos are worn at WEC and at provincial and national competitions, each of which attracts over 1,000 attendees. Your brand will have ongoing visibility across multiple high-profile events throughout the academic year.

SPONSORSHIP TIERS

The table below outlines the benefits included at each sponsorship level. Benefits increase with each tier. Platinum sponsors receive all benefits plus the option for a keynote address to the full competitor audience.

Perk	Supporter >\$500	Silver \$1,000	Gold \$1,500	Diamond \$2,500	Platinum \$3,000+
